In terms of longevity, men may derive more benefits from marriage than do women.

Kristen Benson, the FC BOCES Career and Technical Director, said the class will be opened to high school students as an elective. The class is designed for those who want to learn about billing and coding in the health industry, and who want to take a step up in their careers. Benson noted that several options could be explored, including creating a one-stop center for doctors, who could come to one place for all their needs (such as medical insurance, home maintenance needs, and groceries). Stickels explained that at one time, all patient services and personnel were handled by one doctor, surgeon, one neurologist, one podiatrist, two hospitalists, and one orthopedic surgeons, four internal medicine specialists, six OB-GYN providers, two pediatricians, three family medicine providers, and 11 others. She said WRMSO’s current roster of physicians includes 21 providers at Riverton Memorial Hospital, plus the Wind River Healthcare Center for the Northern Arapaho Tribe and the Eastern Shoshone Tribe. They also serve the hospitalist program. According to Benson, the program is successful because of the team’s hard work and dedication.

The “everything else” includes a realtor, insurance agents, and personnel or paperwork. They do paperwork, file the insurance and taxes, and take care of the paperwork. Benson noted that several options could be explored, including creating a one-stop center for doctors, who could come to one place for all their needs (such as medical insurance, home maintenance needs, and groceries). Stickels explained that at one time, all patient services and personnel were handled by one doctor, surgeon, one neurologist, one podiatrist, two hospitalists, and one orthopedic surgeon, four internal medicine specialists, six OB-GYN providers, two pediatricians, three family medicine providers, and 11 others.
